Profile

Hello! I'm Jamie! Thank you for taking the time to read my resume. I've been working in tech, one way or another, since the high school band I was in needed a website. I love all things tech, from graphic design to 3D to development, DevOps to video editing and music production. While I like to consider myself a jack of all trades, I master in application and product management. I have over a decade of experience leading teams in the discovery, architecting, management, engineering, debugging, and deploying projects.

Work Experience

2022 - 2023

Attane, Inc.
Kansas City, MO

Sr. Solution Designer

- As the Product Owner for a website platform technology, I successfully managed communications and inputs from various stakeholders, including Strategy, Sales, and DevOps, to prioritize user stories and enhance the platform capabilities.
- Lead a transformation from waterfall to kanban-like delivery methodology, achieving greater project velocity across multiple products and services, including websites, systems integrations, calculator web tools, and web analytics.
- Expanded supervision to a larger team, collaborated with Marketing Automation, Front-end and Back-end Developers, and Quality Assurance teams to optimize delivery solutions.
- Implemented technical marketing initiatives to generate additional revenue,
- Supported sales and business development in winning key projects,
- managed client product support efforts,
- facilitated merger and acquisition training, and partnered with third-party vendors for seamless integration of capabilities.

2017 - 2022

Attane, Inc.
Kansas City, MO

Technical Director

- Responsible for drafting, reviewing, and maintaining client-facing Master Services Agreements that outlined objectives, services, assumptions, risks, costs, terms, and timing. These agreements effectively communicated the scope of work to clients and internal teams, serving as project contracts.
- Oversaw the entire project development lifecycle, from discovery to analysis, and identified technical solutions to enhance marketing programs.
- Wrote functional specifications to align with client objectives and implemented cost analysis through quote vs actual reporting, expanding the scope of work governance.

Work Experience

2014 - 2017

Attane, Inc.
Kansas City, MO

Lead Developer

- As a full-stack developer & manager, provided technical leadership and managed design, front-end and back-end development, and DevOps solutions.
- Established best practices, streamlined processes, and addressed technical debt and redundancies to optimize digital spending.
- Developed software and deployment architecture across multiple teams, implemented standard operating procedures for delivery processes.
- Ensured compliance with regulations, and maintained server security and uptime in the cloud-based environment.

2010 - 2014

Kenmont Group, Inc.
Richmond, VA

Lead Developer

Provided strategic vision for diverse application and website projects, coordinating with stakeholders to address technical challenges. Developed, maintained software & web applications, managed and facilitated team growth, and implemented streamlined, process-driven development approaches.

2005 - present
